GitHub: [github.com](#)

Email: rashidnayyar000@gmail.com

Mobile: +91-9304607986

SKILLS

Language:	JAVA, C++, Python
Cloud and DevOps:	AWS, Docker, Kubernetes, Azure
Frameworks:	HTML , CSS , Node.JS, React.JS, REST APIs, Microservice
Tools/Platforms:	PostgreSQL , MySQL , MongoDB , Git , GitHub
Soft Skills:	Problem-Solving , Teamwork , Adaptability

PROJECTS

AI Resume Analyzer (NLP-Based Screening System) | [GitHub](#) Jan 2026 - Apr 2026

- Engineered an AI-powered resume evaluation and job alignment system using Natural Language Processing (NLP) for large-scale parsing, skill extraction, and contextual analysis.
- Developed a Flask-based application to process PDF resumes, perform job description alignment, and generate match scoring metrics with optimized backend workflows and real-time response handling.
- Utilized text analytics, information retrieval, and data processing pipelines to enhance candidate-job relevance and improve screening precision, integrating NLP models for efficient evaluation.
- Tech Stack: Python, Flask, spaCy (NLP), SQLite, JavaScript, Bootstrap

Scalable MERN-Based Food Ordering Real-Time Discovery Platform | [GitHub](#) Nov 2025 - Jan 2025

- Built a high-performance full-stack food ordering and restaurant discovery platform with a responsive, user-centric interface..
- Architected a MERN-based system with API-driven communication, secure user sessions, and efficient client-server synchronization for real-time updates.
- Designed an interactive Reels-style UI and implemented optimized state management and database queries to ensure seamless user experience and scalability.
- Tech Stack: MongoDB, Express.js, React.js, Node.js

Full-Stack Bus Booking Management System | [GitHub](#) June 2025 - Aug 2025

- Developed a transport reservation and management platform with secure user access and efficient data handling.
- Integrated API endpoints and token-based authentication, enabling secure operations and seamless frontend-backend interaction.
- Structured backend architecture using schema design and service-layer integration, ensuring maintainability, scalability, and optimized performance.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, Axios, Vite, Git

SUMMER TRAINING

C++ Programming: OOPs Data Structures CSE Pathshala Jun 2025 – Jul 2025

- Completed structured training in C++ programming, Object-Oriented Programming (OOP), and Data Structures Algorithms (DSA) with hands-on coding practice.
- Implemented core OOP principles including Classes, Objects, Inheritance, Polymorphism, Abstraction, and Encapsulation through practical applications.
- Developed mini-projects and solved problems using data structures such as arrays, linked lists, stacks, queues, and trees, along with sorting and searching techniques.

CERTIFICATES

C++ Programming: OOPs Data Structures — CSE Pathshala	June 2025
Privacy and Security in Online Social Media — NPTEL	Apr 2025
The Bits and Bytes of Computer Networking — Google	Sept 2024
Introduction to Hardware and Operating Systems — IBM	Aug 2024

ACHIEVEMENTS

- Achieved secured 2nd place in a Web Hackathon, demonstrating skills in web development, problem-solving, and rapid application development. Aug 2024

EDUCATION

Lovely Professional University Phagwara, Punjab
B. Tech in Computer Science and Engineering; **CGPA: 6.** Aug 2023 – Present

Inter Science College Hazaribagh, Jharkhand
Intermediate; **Percentage: 73.4%** Apr 2022 – Mar 2023

Hazaribagh High School Hazaribagh, Jharkhand
Matriculation; **Percentage: 85%** Apr 2020 – Mar 2021
